

MEDCONNECT WEB SYSTEM COST BREAKDOWN

Below is a comprehensive breakdown of the costs associated with the development and deployment of the MedConnect web system, taking into account the necessary infrastructure, security measures, and ongoing maintenance.

1. Development Costs

The entire website was designed and developed in-house using Django, a robust web framework known for its security and scalability. As the sole developer of the website, I ensured that it meets all necessary requirements.

- **Website Development (Django-based):** ₦160,000
-

2. Server Infrastructure Costs

To host the website locally, we will require a local server setup. The necessary software and hardware components for this setup entail a one-time cost:

- **Local Hosting Setup (Nginx & Gunicorn):** ₦6,000
 - **Router (for Network Creation):** The cost of a pocket router is subject to current market prices.
-

3. Database Costs

We are utilizing a locally hosted PostgreSQL database, which incurs no additional cost as it is included in the local hosting setup.

- **Database (PostgreSQL hosted locally):** No additional cost
-

4. Security Costs

Given that the website handles sensitive information such as patient records, security measures are of paramount importance. We have factored in the following essential security features:

- **Firewall/Anti-DDoS Services:** ₦5,000 (One-time)
 - **SSL Certificate (for secure HTTPS traffic):** ₦4,000
-

5. Maintenance Costs

Ongoing maintenance will be required to ensure the continued smooth operation of the website. This includes bug fixes, software updates, and regular data backups. The maintenance cost will be subject to a mutually agreed-upon arrangement.

- **Maintenance (Development, Hosting, Database, API):** To be determined based on agreement.

Total Estimated Cost

Item	Cost (₦)
Development (Web)	₦160,000
Server Setup	₦12,000 - ₦19,000
Database	No additional cost
SSL Certificate	₦4,000
Security (Firewall, SSL)	₦9,000
Maintenance (Yearly)	To be agreed
Total Estimated Cost	₦190,000 - ₦197,000
