Experience

Bemech Energy Limited
Business Analyst | 2019 – 2022

- Designed and developed executive dashboards in Tableau, integrating data from Redshift and internal systems, enhancing decision support for strategic planning.
- Utilized SQL for data extraction and cleaning, improving data accuracy and reporting reliability through automated checks that reduced errors by 30%.
- Led the consolidation of multiple data sources into unified models using Snowflake and dbt, supporting ongoing and ad-hoc analyses for marketing and finance teams.
- Developed comprehensive documentation for data models and processes, facilitating the organization’s transition to a data-centric culture and aiding in team onboarding.
- Collaborated with engineering and compliance teams to enhance data quality, implementing solutions that improved the accuracy and usability of data across platforms.

Almond Limited
Data Analyst | 2022 – 2023

- Built and maintained data models in Snowflake to support marketing and development teams, ensuring data relevancy and adaptability to changing business needs.
 - Designed and managed A/B testing projects for marketing campaigns, analyzing engagement and conversion metrics which led to a 25% increase in pre-sale orders.
 - Created and implemented dashboards and reports in Power BI to visualize large datasets, providing actionable insights and enhancing decision-making processes.
-
