

Professional Summary

Business Analyst with over 5 years of experience in database management, BI development, and ETL processes. Expertise in SQL (MS SQL, T-SQL, Snowflake), Power BI (DAX, Power Query), and data modeling. Proven ability to design, implement, and maintain data-driven solutions, develop actionable insights from complex datasets, and enhance data quality. Strong communicator with a knack for translating technical concepts into business-friendly terms.

Skills

- Programming Languages: Python, SQL (MS SQL, T-SQL, Snowflake)
- BI & Reporting: Power BI (DAX, Power Query, tabular data modeling), Tableau
- ETL Development: Snowflake, dbt, Alteryx
- Data Technologies: Snowflake, Redshift
- DevOps & Cloud: AWS, Docker, Kubernetes

Experience

Bemech Energy Limited
Business Analyst | 2019 – 2022

- Designed and developed executive dashboards in Tableau and Power BI, integrating data from Redshift and internal systems to support strategic decision-making.
- Utilized SQL (T-SQL, Snowflake) for data extraction, transformation, and cleaning, improving reporting reliability with automated checks, reducing errors by 30%.
- Led the consolidation of data sources into unified models using Snowflake and dbt to support ongoing and ad-hoc analyses for marketing and finance teams.
- Developed comprehensive documentation for data models and ETL processes, streamlining onboarding and enhancing the team's efficiency in managing data-driven solutions.
- Collaborated with engineering and compliance teams to resolve data quality issues, resulting in improved data accuracy across platforms.

Key Achievements:

- Enhanced Power BI dashboards for finance and marketing teams, driving data-informed decisions.
- Reduced data errors by 30% through automated SQL validation checks and robust data cleansing processes.

Almond Limited
Data Analyst | 2022 – Present

- Built and maintained data models in Snowflake to support cross-functional teams, including marketing and product development, ensuring data relevancy and scalability.
- Designed and executed ETL processes, integrating multiple data sources to ensure accurate reporting and analysis.
- Developed and managed A/B testing projects for marketing campaigns, which led to a 25% increase in pre-sale orders by analyzing customer engagement metrics.
- Created and implemented interactive dashboards and reports in Power BI, leveraging DAX and Power Query to visualize large datasets, providing actionable insights to stakeholders.

Key Achievements:

- Led the creation of tabular data models and Power BI dashboards for the sales team, increasing reporting efficiency by 40%.
 - Improved data accuracy and quality through systematic ETL pipeline development, ensuring the seamless integration of marketing data.
-

Education

University Canada West
MBA in Finance and Analytics

Veritas University
Bachelor of Art in Accounting
